1 ⚠️ ATTENTION!

Treat every firearm as loaded.

Before training: remove the magazine, lock the slide open, then physically and visually inspect the chamber to confirm the firearm is completely clear of ammunition. Keep all live ammo out of the training area.

Always keep firearm pointed in a safe direction

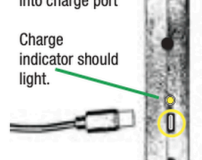

2 Anatomy of your Smart DryFireMag

3 Charge your Smart DryFireMag

Plug USB charge cable into charge port

Charge indicator should light.

Charge time ~ 2 hours
Charge indicator light will go out when charge is complete.

4 Install Laser Battery

Note battery orientation

5 Load Laser Cartridge into your pistol

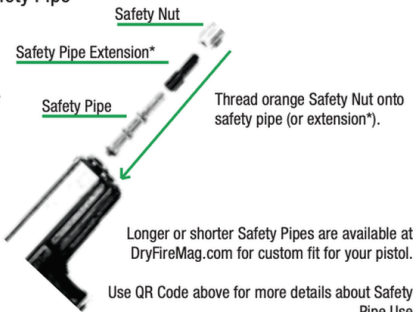

Place Laser Cartridge into chamber and press until it stops

Release slide.

6 Install Safety Pipe System

Gently Insert Safety Pipe and Extension* into barrel and gently rotate clockwise to connect to laser cartridge.

Longer or shorter Safety Pipes are available at DryFireMag.com for custom fit for your pistol.

Use QR Code above for more details about Safety Pipe Use

*If Needed

7 Insert the Smart DryFireMag to your Pistol

Insert the DryFireMag into the pistol until it audibly clicks into place.

Note: The DryFireMag will not seat flush to the magwell in compact and subcompact Glock[®] models.

8 Start Dry Fire Practice

Only point your weapon in a safe direction

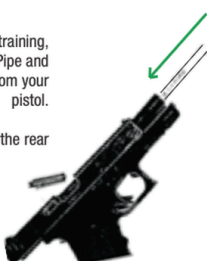

Enhance your laser dry fire training with an electronic target or simulator (required for IR laser) available on DryFireMag.com

9 Finishing up

When finished training, remove the Safety Pipe and Laser Cartridge from your pistol.

Lock slide to the rear

Use provided Barrel Plunger to press laser out of barrel.
